This is a living connection between all members of the family tree. Each family member brings attributes and universal qualities for the entire family to realize and enjoy. Taking time to observe and appreciate the contribution of each Grandparent increases the corresponding universal quality for future generations. Each of the 12 birth order positions has within it, lessons to be learned and positive abilities to be expressed. When we embody the lesson of each position, a natural ability is accessed, and we are more capable of receiving the universal quality from a corresponding grandparent.

Starting with the #1 boy at the bottom, notice how the blue line links all the Yin positions with grandparents from the mother's family, and the red line links all the Yang positions with the father's family. Taking a few minutes each day to dwell on the continuum of these connections increases these abilities and qualities within yourself and your family.
